

Sevylor Colorado Inflatable Canoe / Kayak

The Sevylor Colorado is a multi-purpose inflatable canoe. Ideal for use almost anywhere, whether for a trip along a local canal, fun on the coast or paddling round a lake. The Colorado is a fully covered inflatable - the floor and separate side air chambers are all covered by a tough outer material. All the chambers are easily accessible through zip openings if you need to get to them. The Sevylor Colorado is supplied with two seats with sturdy backrests and inflatable bases. The position of the seats can be adjusted to suit whoever is using the canoe - simply adjust the base on the velcro pads and tighten or loosen the straps. The Sevylor Colorado inflatable comes with its own carry bag, so when you're finished for the day, simply let the air out of the canoe, roll it up and pack it away.

Specification	
Model	KCC 335 (2011)
Size inflated	330 x 94 cm
Weight	16.4 kg
Max. capacity	2 Adults
Inflatable chambers	3
Maximum load capacity	200 kg
